

SCAGLIA'S PRODUCT LINES

- Zero gravity balancers for handling, with mechanic or pneumatic end effectors.
- Waste cutting machines for cylindric and flanged supports.
- Accessories for textile industry.

STRIPEX TAGLIASTRAZZA

Machine for removing yarn waste from cylindrical supports
Machine for removing yarn waste from metallic supports

1838

Scaglia

TAGLIASTRAZZA

- It removes waste very rapidly and rationally from bobbins, tubes, metal cops of any shapes, allowing a total recovery of it.
It doesn't damage metallic yarn support.
- It is particularly advisable for thermoplastic yarns (nylon 6, nylon 6.6, polyester, acrylics, polypropylenics, etc.) but in some cases it may be profitably used for artificial and natural fibres as well.
- Yarn is cut by a blade of hot compressed air, with no direct contact of machine and support. The waste obtained is directly conveyed by air into a container.
- It is easy to use, it doesn't require any qualifield labour, and it involves no danger for the operator.
- It is completely self-contained; to operate it just requires connection to three-phase power line.

STRIPEX

STRIPEX is a patented machine for removing waste from cylindrical tubes, which offers many advantages:

- it removes all waste in one stage only;
- it doesn't damage the support surface;
- it cleans perfectly even the supports which have been slightly deformed by the pressure of yarn;
- it cleans supports as large as 200 mm in diameter, and as long as 550 mm;
- it cleans supports of any material;
- it assures high productivity, and the maximum operating safety.

Characteristics

Max. support outside diameter about 200 mm
Max. support length about 550 mm
Max. waste removable thickness about 100 mm
Max. removing linear speed 13 m/min.
Max. absorption 7,5 Kw
N° of pieces per hour 350/500

Dimensions of the machine

Length 2650 mm
Width 750 mm
Height 1520 mm
Weight about 940 Kg
