

New **TAGLIASTRAZZA**[®] Air knife machine

... **the 'bench'** version

dimensions: cm 30x30x50h

weight: Kgs 25,00

- It removes waste from bobbins, tubes, metal cops of any shapes very rapidly and rationally, allowing a total recovery of them
- It does not damage metallic yarn support
- It is particularly advisable for thermoplastic yarns (Nylon 6, Nylon 6.6, Polyester, acrylics, polypropylenics, etc.)
- Yarn is cut by a blade of hot compressed air, with no direct contact of machine and support
- It is easy to use, it does not require any qualified labour, and it involves no danger for the operator
- It is completely self-contained; to operate it just requires connection to power line
